

Use Case 1: Add Task

Primary Actor

CENTRUM owner / user

Goal

To create a new task and connect it to an existing customer, so CENTRUM Marketing can keep track of work, deadlines, and task status.

Preconditions

- The system is running.
- The user is on the main menu.
- At least one customer exists in the system.

Success Postconditions

- A new task is created.
- The task is connected to the selected customer.
- The task is stored in the system.
- The customer's latest activity is updated.
- The system confirms that the task was created.

Main Success Scenario

1. The user selects **Task Management** from the main menu.
2. The system displays the Task Management menu.
3. The user selects **Add Task**.
4. The system asks for a customer ID.
5. The user enters the customer ID.
6. The system validates the customer ID .
7. The system asks for the task title.
8. The user enters the title.
9. The system asks for the task description.
10. The user enters the description.
11. The system asks for the deadline.

12. The user enters the deadline.
13. The system asks for the task status.
14. The user selects a task status.
15. The system creates the task and links it to the customer.
16. The system stores the task.
17. The system confirms that the task was created successfully.

Alternative Flow 1: Customer Does Not

Exist

At step 6, the system cannot find a customer with the entered ID.

1. The system shows an error message.
2. The system shows an error message and returns to the task menu.

Alternative Flow 2: Deadline Is in the Past

At step 12, the user enters a deadline that is in the past.

1. The system shows an error message.
 2. The task is not created.
 3. The user returns to the task menu.
